## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations in claims 9-11 (camera system) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Backlund (6,209,401).

a. With respect to claims 1 and 6-8, Backlund teaches a system comprising at least one sensor (21) that records at least a physical variable during an operating process and generates signals (Fig.3).

b. With respect to claims 2-4, Backlund teaches a system further comprising at least one circuit (27) for processing said signals and a power supply for providing power (Col.2, lines 43-44)(Figs. 3,4).

c. With respect to claim 5, Backlund teaches a system wherein said power supply comprises a battery (Col.2, lines 24-25).

d. With respect to claim 14, Backlund teaches a system wherein said system can be removed from a material (7)(Col.1, lines 62-65).

5. Claims 1-4, 9-13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Birkenfeld (5,947,024).

- a. With respect to claim 1, Birkenfeld teaches a system comprising at least one sensor / fault detector (5) that records at least a physical variable during an operating process and generates signals (Fig.1).
- b. With respect to claims 2- 4, Birkenfeld teaches a system further comprising at least one circuit (11) for processing said signals, a power supply for providing power and a transmitter (7a) and receiver (7b)(Col.3, lines 56-58).
